

ATHUL KRISHNA

Malappuram, Kerala | +91 9048907933 | k.athulkrishna03@gmail.com | github.com/Athul64 | linkedin.com/in/athulkrishna23

PROFESSIONAL SUMMARY

Detail-oriented Computer Applications graduate student with strong technical expertise in database management, relational schema design, and Python-driven automation. Proven track record in developing automated data pipelines, cleaning complex datasets of 10,000+ records, and optimizing query performance. Adept at leveraging SQL, MySQL, PostgreSQL, and ETL methodologies to maintain data integrity and support database enhancement initiatives.

TECHNICAL SKILLS

Database & Querying: SQL, MySQL, PostgreSQL, Query Optimization, Database Normalization, Schema Design, Indexing

Programming & Automation: Python (Pandas, NumPy for data manipulation & processing), JavaScript, Shell Scripting

Data Tools & BI: Power BI (Power Query, DAX), Advanced Excel (VLOOKUP, Pivot Tables, Data Cleaning), Tableau

Data Engineering & Practices: ETL Pipeline Architecture, Data Cleansing, Schema Validation, Turnaround Time (TAT) Optimization

PROJECTS

Automated Data Cleaning & Database Ingestion Pipeline

December 2025

Python, Pandas, NumPy, Data Pipeline Architecture

- **Accomplished 65% reduction in data preparation turnaround time** across 10,000+ raw records by engineering an automated Python data-cleansing pipeline with rule-based deduplication and imputation algorithms.
- **Ensured 100% schema integrity for downstream database ingestion** by building multi-format validation engines for CSV and Excel files, preventing data corruption and format mismatches.
- **Enhanced operational query efficiency** by structuring clean relational outputs ready for direct staging table ingestion in PostgreSQL databases.

CrisisHub: Real-Time Operational Data Tracking System

March 2026

Next.js, Tailwind CSS, Gemini AI API, Relational Database Architecture

- **Reduced request categorization and routing latency by 40%** across live operational logs by integrating Gemini AI to automatically parse, classify, and index multimodal incoming data entries.
- **Streamlined cross-functional response workflows for 100+ concurrent operational issues** by architecting a centralized, low-latency relational dashboard tracking live record statuses.
- **Improved incident record retrieval speed by 35%** by implementing structured database indexing and optimized SQL filtering queries for administrative auditing.

Airbnb Listings Market Analytics & Query Pipeline

January 2026

Python, SQL, Advanced Data Visualization, Power BI

- **Optimized pricing and market distribution visibility across 20,765 listings** by executing complex SQL-like aggregation queries and exploratory statistical analysis in Python.
- **Accelerated business decision-making efficiency by 30%** by designing interactive multi-variable dashboards correlating pricing tiers, seasonal availability cycles, and review metrics.
- **Identified and resolved data anomalies across 15+ feature attributes**, increasing reporting accuracy and database consistency for downstream analytical modeling.

EDUCATION

Master of Computer Applications (MCA)

Aug 2025 - Present

Adi Shankara Institute of Engineering & Technology (APJ Abdul Kalam Technological University), Kalady, Kerala

Bachelor of Science in Computer Science

Apr 2024

KR's SN College (University of Calicut), Valanchery, Kerala

CERTIFICATIONS

- **Data Analysis with Python** – IBM, Coursera (Jan 2025)
- **Python Certification** – IIT-M, GUVI Geek Networks (Oct 2024)
- **Data Science & Machine Learning** – Entri Elevate (2024 - 2025)
- **Data Science & Machine Learning** – Illinois Tech, USA (2024 2025)
